Project 2

1 Requirement

- Apply pattern recognition methods from the course to some data of your interests, or explore the implementation details of an algorithm that you find intriguing in the course. No restriction on the data and the task. For example, you can consider the tasks related to your undergraduate thesis.

- Outline what you have done and summarize your findings. You can submit either of the following

    - A formal project report.
    - A poster + a short video describing your work.

- Submission in group (max size = 4) is allowed.

- Deadline: 23:59, 19 Nov 2023.
